

Clavis

The AI compliance analyst.

Investor & demo briefing • 2026

●

Compliance still runs on humans copy-pasting names.

of KYC still done manually

spent on compliance every year

per single corporate KYC review

Sources: LexisNexis Risk Solutions (2023) · Fenergo / The Fintech Times (2024) · Statista (2024)

- Why it breaks

The weakest link is the human in the loop.

Data-entry errors

Document misidentification

Confirmation bias

Improper risk assessment

Failure to update records

Inconsistent verdicts

One typo triggers hours of phantom work.

Human error

2

False match

3

Alert fires

>

4

Hours lost

90-95%

of alerts are false positive.

up to 90%

of analyst time spent dismissing them

Sources: FACCTUM (2026) · sanctions.io; Sardine A

●

Getting it wrong is no longer survivable.

~\$4B

in AML/KYC fines in 202

\$1B+

on crypto alone

90%

of banks: human error hits risk decision

⚖

Regulatory exposure

Reputational damage

Wrong counterparty
